

Job Title: Quality Inspector I

Location: Valencia, CA

Position Type: Full Time, hourly

Salary Range: \$21-25

Company: WG Henschen, an Abound Aerospace Company

About Us: WG Henschen, an Abound Aerospace Company, is a dynamic and innovative company that specializes in the distribution of aerospace hardware that primarily services the commercial and defense market. The organization focuses on blending state-of-the-art technology with a passion for exceptional customer service to deliver an unparalleled customer experience. A deep-rooted commitment to employees is also at the heart of the family-owned businesses. WG Henschen strives to create a support work environment that values innovation, creativity and collaboration. Our company is growing, and we are excited to welcome new team members who want to be part of our dynamic journey.

Job Overview: A Quality Level I Inspector is responsible for inspecting and evaluating materials and products to meet industry standards and regulations. Check the quality of all incoming and outgoing material and products as per procedures and customer Quality Plans. A Quality Inspector will possess a trained eye for detail and will be reliable and committed.

Key Responsibilities:

1) Inspection:

- Conduct detailed certification, dimensional, and visual inspections of aerospace components to verify compliance with engineering specifications, industry standards, and regulatory requirements.
- Read blueprints and instructions to comprehend the quality expectations for the product and supplies.
- Approve or reject materials with respect to quality standards and record supplier performance.

2) Documentation:

- Maintain thorough and accurate records of inspection results, procedures, and quality documentation.
- Generate inspection and rejection reports and ensure all required documentation is completed according to industry standards.

3) Quality Assurance:

- Collaborate with quality engineering teams to ensure that products meet quality standards.
- Identify and report any deviations, defects, or non-conformities, and work with relevant teams to implement corrective actions.

4) Process Improvement:

- Identify opportunities for process improvement in quality inspection procedures and contribute to the development and implementation of enhanced quality control processes.

5) Compliance:

- Stay current with aerospace industry regulations, standards, and best practices.
- Ensure that all inspection activities adhere to relevant quality management systems and aerospace regulations

6) Measurement and Calibration:

- Use precision measurement tools and equipment to verify dimensional accuracy and tolerances.
- Participate in the calibration and maintenance of inspection tools to ensure accuracy.

7) Communication:

- Communicate inspection results and quality issues effectively to engineering, production, and management teams.
- Collaborate with cross-functional teams to address quality concerns and implement corrective actions.

8) Safety Compliance:

- Adhere to safety protocols and guidelines when performing inspections and tests.
- Report any safety hazards or incidents promptly.

Qualifications:

1) Education/Skills:

- High school diploma or equivalent
- Some relevant experience with various inspection tools and equipment, such as calipers, micrometers, gauges, optical comparator, and Keyence Imaging Measurement machine.
- Strong attention to detail and accuracy in documentation.
- Excellent communication and interpersonal skills.

2) Physical Requirements:

- Ability to perform detailed inspections requiring visual acuity and attention to small details.
- Comfortable using hand tools, measuring instruments, and lifting/moving moderate loads.
- May require working additional hours, including weekends and holidays, to meet quality operational needs.

WG Henschen is an equal opportunity employer and welcome applicants from all backgrounds.
